Visit Riyadh Metro Official Website

The **Riyadh Metro** is a groundbreaking rapid-transit system in Riyadh, Saudi Arabia. Launched in phases beginning **December 2024**, it features six automated lines—**Blue, Red, Orange, Yellow, Green, and Purple**—spanning **176 kilometers** and **85 stations**. It is the **world's longest driverless metro**, and part of the city's vision for sustainable urban mobility aligned with **Saudi Vision 2030**.

Managed by the **Royal Commission for Riyadh City**, the metro uses state-of-the-art trains from Siemens, Alstom, and Bombardier, running every 3–7 minutes and serving millions daily. Iconic stations like **KAFD**, **STC**, and **Qasr Al-Hokm** are equipped with air conditioning, free Wi-Fi, accessibility options, and retail spaces. Environmentally conscious design includes solar energy use and LEED-certified buildings.

By dramatically reducing car dependency, easing congestion, and improving air quality, the Riyadh Metro is transforming how residents and visitors move across the capital. It's a bold step toward a smarter, more efficient, and eco-friendly future for Saudi Arabia.
